

Airea

The most successful pod
in the marketplace

orangebox

Product Description

The Airea pod system is the most successful pod in the marketplace, with thousands of pods installed around the world since its launch in 2006. Ever since its ground breaking introduction, the Airea has provided an alternative for private spaces ranging from phone booths through video conference rooms to general meeting rooms.

Airea has 20 standard configurations covering everything from a simple phone booth and quiet room to a variety of general use office pods and larger meeting room pods. Since its launch, the need for freestanding meeting rooms and flexible workrooms has increased dramatically, which in 2014 led Orangebox to expand its product range with the Air3 – an enhanced and more refined pod system.

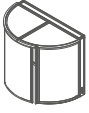

Airea can be assembled in just a few hours to provide a pod meeting room. This can then be moved, reconfigured and fully re-used in a new location – within the same space or in an entirely new building – as business needs evolve.

Top – AIREA-110, **Bottom** – AIREA - Special
